VELA

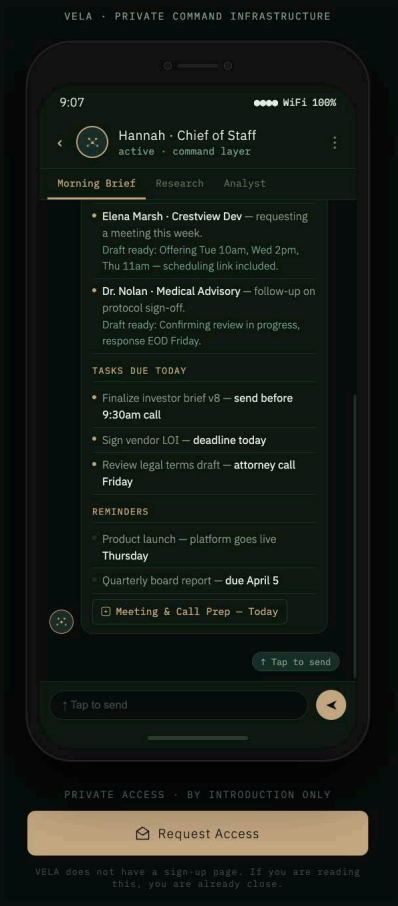
PRIVATE COMMAND INFRASTRUCTURE

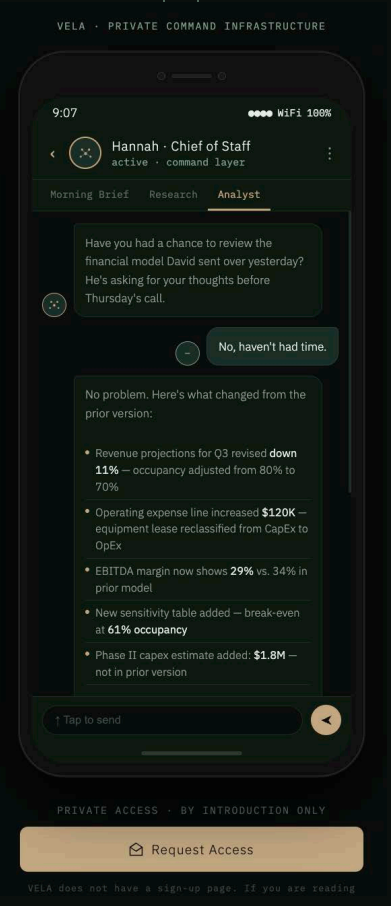
PRIVATE ACCESS
BY INTRODUCTION ONLY

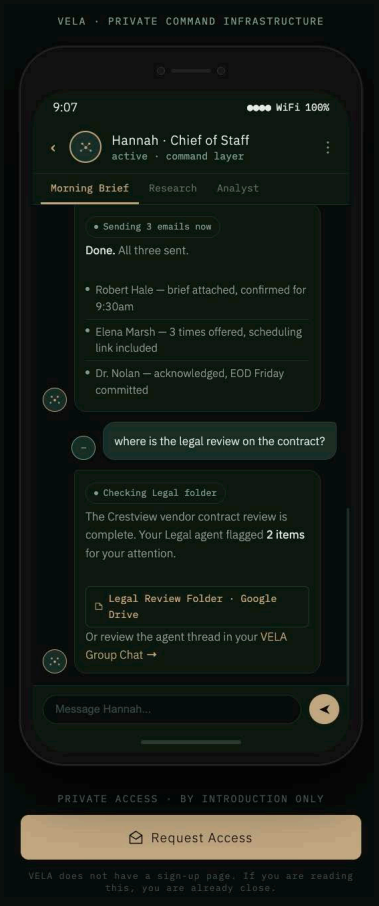
YOUR JUDGMENT. OUR INFRASTRUCTURE.

You have a zone of genius. *Everything else is noise.* We handle the noise.

VELA is private command infrastructure — a sovereign intelligence layer installed on your hardware, running beneath you so you can operate above everything else. Not a chatbot. Not a platform. Six agents, one standard, answering to no one but you. Hannah, your Chief of Staff, runs point. The rest never stop.







WHILE YOU'RE LIVING YOUR LIFE

You're at dinner. In the gym. On a flight. Your team doesn't notice you're gone.

YOU'RE ON A FLIGHT

No signal. No problem.

Your morning brief is waiting when you land. Three meetings prepped. Inbox triaged. Two drafts ready for approval. Your team didn't notice you were gone.

YOU'RE IN THE GYM

It's already done.

The contract that arrived at 8am has been reviewed and red-flagged. The marketing copy your agency sent over has been torn apart and redrafted. The competitive analysis is in your Drive. All of it — before you picked up your phone.

YOU'RE AT DINNER

Be present. Fully.

The investor brief for tomorrow is written. Documents pulled, formatted, attached, sent. The follow-up from this afternoon's call went out over your signature. You're not missing anything. You're just not doing everything yourself anymore.

IT'S 2AM

Your team is still working.

Monday's brief is being built. Friday's wrap-up is filed. The proposal that came in after hours has been reviewed. When you wake up, you're already ahead. That's not a feature. That's the point.

WHAT GETS DONE — EVERY DAY, WHETHER YOU ASK OR NOT

01

Deep research, delivered as documents

Competitive intelligence, due diligence, market analysis, investment briefs. Ask in plain language, get a polished document back. No delegation lag. No explaining the context twice.

02

Legal & marketing caught before they cost you

Contracts red-flagged. Copy torn apart and rebuilt. Decks pressure-tested. You arrive at every decision already knowing where the bodies are buried.

03

Your inbox, managed without your involvement

Email read, triaged, drafted. Documents pulled from Google Drive, attached, sent. You approve before anything goes out — but by then, the work is already done.

04

Briefs, wrap-ups, and prep — without asking

Morning brief every day. Weekly review every Friday. Pre-call prep 30 minutes before every meeting. Post-call debrief captured. Institutional memory that never forgets — because it literally cannot.

THE COMMAND LAYER — DEPLOYED ON DAY ONE

HANNAH — COS	Chief of Staff. Runs point on everything. Coordinates every agent, owns your calendar, manages communications. The intelligence that connects every moving part — and never has an off day.
RESEARCH	Searches the web, pulls your Drive docs, compiles finished intelligence briefs. Not search results — documents you can walk into a room with.
ANALYSIS	Financial models stress-tested. Numbers challenged. Decks pressure-checked before they go in front of anyone who matters. It doesn't flatter you — it prepares you.
LEGAL	Contracts reviewed, red flags surfaced, language tightened. You arrive at outside counsel already knowing where the problems are.
MARKETING	Positioning sharpened, copy written, campaigns drafted. Your voice, consistent and amplified across every channel.
PROJECTS	Deadlines tracked, blockers flagged, status surfaced. You lead the work instead of chasing it.

This is not a tool. This is infrastructure.

VELA runs on your hardware. Your data never leaves your machine. Engineered from the ground up to minimize API token usage while delivering full capability — lower operating costs, faster responses, a system you rely on the way you'd rely on a fully staffed executive team. Installed once. Running always. Answering to no one but you.

INVESTMENT

TURNKEY — FULL SERVICE

Done For You

$10,000

One-time. Everything included.

INCLUDES

- Dedicated Mac Mini M4 — configured and shipped
- Full installation, calibration, and deployment
- All six agents briefed on your business
- Telegram + WhatsApp integration live on day one
- Gmail, Google Drive, and Calendar connected
- 12 months of remote monitoring and support
- Priority updates and system optimization

SELF-INSTALL — DIY

Done With You

$5,000

One-time. You supply the Mac Mini.

INCLUDES

- Full access to private GitHub repository
- All install scripts, templates, and agent files
- Step-by-step guided installation session
- Documentation and configuration reference
- 30 days of setup support
- Optional: add remote monitoring at $250/month

AI OPERATING COSTS

Paid directly to Anthropic — not to VELA. Light users: $75–$100/month. Active power users running daily multi-agent workflows: up to $500/month. The system is optimized to keep these costs as low as possible while delivering full capability.

THE QUESTION IS NOT WHETHER YOU CAN AFFORD IT

It is whether you can afford to keep running without it.
